

9.2.2. OPERATION OF THE MAIN ROTOR CONTROLS

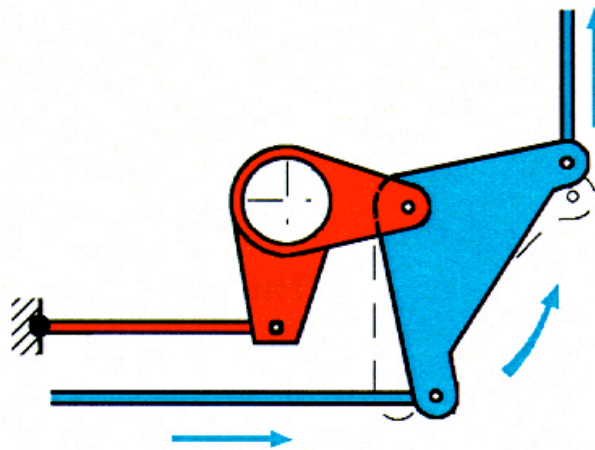

OPERATION OF THE MIXING UNIT

Cyclic stick to right

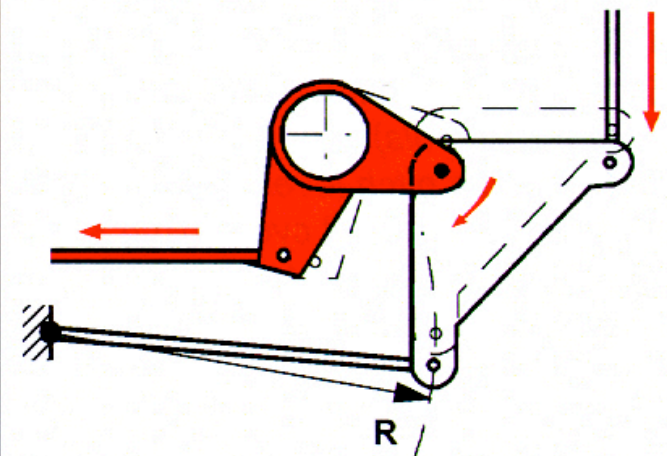

The roll bellcrank pivots about the collective pitch bellcrank which is fixed. This motion is reversed on the other bellcrank.

Cyclic stick forward

The pitch bellcrank pivots about the collective pitch bellcrank which is fixed.

Collective pitch lever up

The mixing unit shaft and the collective bellcranks rotate, displacing the pitch and roll bellcranks through the same distance.
